West Chester, Pa.
12.30.1890.

Prof. Watson
Harvard University,
Cambridge, Mass.

My Dear Sir,

I enclosed here with a note directed to you, which came to me today from Mrs James.

For some two years past I have been collecting the published ^{works} of Chester Co. Authors and am now engaged in preparing short biographical notices of them with full descriptions of title pages. I hope to have the work ready for the printer next Spring.

I trust that you will be able to send me the Florula referred to by her. She further suggested that you might have duplicate copies of the following

Obit. Notice of Darwin, read
before the Am. Philos. Soc. Feb. 19. 1864.
by T. Potts James

~~~~~  
Essay on the Development and  
Modification of the External  
Organs of Plants. 1839. pp. 38  
~~~~~

Assuring you that I will
appreciate your kind attention
in this matter,

I am, yours truly,
H. Rusch Kervey
